HON 322Z, Money Management
HON 324A, Spring Phenology: From Snowmelt to Finals
HON 324B, Everything You Want to Know About France
HON 324C, Conflicts in the Middle East
HON 324D, Harry Potter: A Retrospective

HONORS KITCHENETTE
One of the many perks as a member of Honors is the use of our kitchenette; the appliances, games, and many resources available there. All we ask is for you to be considerate and clean up after yourself. This also gives a better impression to visitors and helps avoid attracting bugs. Thank you.
- Admin. Staff
Researchers in the College of Human Sciences and Families Extension at Iowa State University are recruiting students to serve as trainers in the Living well through Intergenerational Fitness and Exercise (LIFE) program research project. Trainers are needed to contribute to this ISU research that advocates developing healthy relationships between generations through exercise and fitness activities. The first of these activities is an on-site Wii® Active exercise regime. Participants in the LIFE program include older adults attending the meal program at local senior centers.

The investment for trainers in terms of time is significant and there is opportunity to gain substantive and practical knowledge. Students have the option of participating as part of an independent study (GERON 490). Students are responsible for making these arrangements beforehand. GERON 490 (syllabus attached) is under the direction of Dr. Peter Martin. As study participants, students have the right to discontinue their involvement at any time. Any student who chooses to drop out of the research project will be required to write a 15-page paper on wellness and aging as an alternative means of receiving course credit. Research team members (Francis, Franke, Margrett) cannot be directly involved with the evaluation of students per IRB regulations, but we are happy to help facilitate this unique experience for students.

If you have students who may be interested in this research opportunity please contact me for more information, including recruitment flyers, or to schedule a short in-class program presentation, life@iastate.edu or 294-1456.
Students of all majors and years are invited to attend an informational meeting about prestigious international scholarships. The meeting will be held from 5:00 – 6:00 p.m. on Tuesday, November 16 in the Memorial Union’s Cardinal Room.

ISU coordinators for the Rhodes, Marshall, Fulbright, Boren & Rotary Scholarships will describe these highly-competitive international awards, their selection criteria, and the types of study, activities and/or language training each supports.

The majority of these scholarships require applicants to be US citizens; international students may be able to apply for the Rotary Scholarship through chapters in their home country.

**SMART SCHOLARSHIP FOR SERVICE PROGRAM**

The Science, Mathematics and Research for Transformation (SMART) Scholarship for Service Program is part of a highly concentrated effort to improve the flow of new, highly skilled technical labor into the Department of Defense (DoD). The purpose is to promote the education, recruitment and retention of outstanding undergraduate and graduate students in science, mathematics, and engineering studies; the DoD is also interested in supporting the education of future scientists and engineers in a number of interdisciplinary areas. SMART Scholars are awarded an annual stipend, full tuition, required fees, health insurance, and a $1000 book allowance per year. The SMART Program will allow individuals to acquire an education in exchange for a period of employment with the Department of Defense. The program is intended for citizens of the United States; students must be at least 18 years of age at the time of award. Application opens August 1st and the deadline is December 1st.
